

## Anti-human CD16 (clone CB16-VR)

Catalog No: MP-AA-14

---

### BACKGROUND

CD16 is the low affinity receptor for the Fc portion of the IgG antibodies

### PRODUCT

Each vial contains the indicated amount of IgG (HPLC, Prot. A) in 0,1% gelatin and 0,05% NaN<sub>3</sub>.

### SUBCLASS

Mouse IgG2a

### SPECIFICITY

Known also as FCR11a and FCR11b , is expressed on: NK, granulocytes, monocytes, macrophages, T-cell subset (dim), T-cell receptor subset (dim).

### STORAGE

Store frozen, avoid repeated freeze-thawing. Stable for 2 yrs.

### SHIPPING CONDITIONS

Room temperature.

### RESEARCH USE

This antibody is for laboratory research use only, not for human or in-vivo use.

### APPLICATIONS

See enlisted references
