

Anti-human CD31 (clone Moon-1)

Catalog No: MP-AA-16

BACKGROUND

The molecule is instrumental in removing aging neutrophils from blood stream by macrophages. In this regard, the molecule plays a key role in tissue regeneration

PRODUCT

Each vial contains the indicated amount of IgG (HPLC, Prot. A) in 0,1% gelatine and 0,05% NaN₃.

SUBCLASS

Murine IgG1

SPECIFICITY

Known also as PECAM-1, GPIIb, endocam, is expressed on: macrophages, Plt, leukocyte and precursor. Since it is expressed on vascular endothelial cells, it is utilized for enumerating vessels in normal, regenerating and transformed tissues. It is also expressed in lymphatic endothelial cells

STORAGE

Store frozen, avoid repeated freeze-thawing. Stable for 2 yrs.

SHIPPING CONDITIONS

Room temperature.

RESEARCH USE

This antibody is for laboratory research use only, not for human or in-vivo use.

APPLICATIONS

See enlisted references
